PROJECT

Web Development - Group Project

08/2025- 07/2025T

Using VS Code

- Created a website for Samudhra Bookshop using VS Code.
- Designed with HTML, CSS, and JavaScript for structure, style, and interactivity.
- Added pages like Home, Categories, Best Sellers, and Contact.
- Made it responsive and user-friendly for both desktop and mobile.
- Focused on a simple design and easy navigation.

Web Designing

01/2025 - 02/2025

Using Figma

- Designed it for our campus website using Figma.
- Created a clean and user-friendly interface with easy navigation.
- Added pages like Home, Dashboard, My Courses and Contact.
- Used consistent colors, fonts, and layouts for branding.
- Focused on responsive design for desktop and mobile.

Web Development

09/2024 - 10/2024

Using VS Code

- Built a website for an online smart watch shop named SmartWatches.
- Developed using HTML and CSS only.
- Designed a clean and responsive layout.
- Included key sections: Home page, Product listings, and Contact page.
- Focused on smooth navigation and user-friendly interface.
